#### Course Descriptions\*:

**MGT-301:** An introductory course in management as a discipline and a process. Major topics include the evolution and scope of management, decision-making, planning and strategy, organizing and staffing, leading and control and change. The importance of management in the global environment and ethical considerations of management decisions also are included.

**MGT-325:** An introduction to the principles of corporate financial management. The principles apply also to other forms of business, governments, and non-profit organizations. The time value of money is emphasized in investments of real or financial assets. Planning for current assets and liabilities and long-range capital is covered. Risk and expected value of money is emphasized in investments of real or financial assets. Planning for current assets and liabilities and long-range capital is covered. Risk and expected values (statistics) are used in the planning and assessment of investments. Also, the knowledge of different kinds of markets is described along with some financial theories.

**PSY-427:** A review of the major historical and contemporary personality theories that attempt to explain and describe human behavior. Offered annually.

**SSC-101:** An interdisciplinary course designed to provide students with the opportunity to consider the many ways in which human beings function as individuals, as members of larger groups and demographic segments, and as members of a particular culture. This course explores the disciplines of sociology, psychology and anthropology within the framework of the scientific method, social constructivism, ethics and values. Value systems, including the core values of Saint Leo University, and the ways in which they affect social structure are also explored.
